Section 2: To be completed by Physician/ Pharmacist

Drug Name & Strength:	DIN:	Dosage Instructions:

Eligibility for drug coverage is dependent upon the patient meeting at least one of the qualifying criteria listed below. If the patient has another drug plan, prior authorization may cover some or all of the excess not paid by the primary plan.
Please indicate if the patient meets at least one of the following qualifying criteria for drug coverage:

- ❑ To treat chronic moderate to severe plaque psoriasis in adults who are candidates for phototherapy or systemic therapy.
- ❑ Stelara is indicated for the treatment of chronic moderate to severe plaque psoriasis in adolescent patients from 12 to 17 years of age, who are inadequately controlled by, or are intolerant to, other systemic therapies or phototherapies.
- ❑ Stelara is indicated for the treatment of adult patients with active psoriatic arthritis. Stelara can be used alone or in combination with methotrexate (MTX).
- ❑ Stelara is indicated for the treatment of adult patients with moderately to severely active Crohn's disease, who have had an inadequate response, loss of response to, or were intolerant to either immunomodulators or one or more tumour necrosis factor-alpha (TNFα) antagonists, or have had an inadequate response, intolerance or demonstrated dependence on corticosteroids.
